## NOTES

**Key:** AED = antiepileptic drug; del-rel = delayed-release; ext-rel = extended-release; ODT = orally-disintegrating tablets

<sup>1</sup> Adjunct therapy only. <sup>2</sup> Temporary alternative to oral therapy. <sup>3</sup> Only if refractory to other therapy. <sup>4</sup> Conversion to monotherapy in adults with partial seizures who are on a single AED (see full labeling). <sup>5</sup> Also indicated for tonic seizure. <sup>6</sup> For generalized tonic-clonic status epilepticus. <sup>7</sup> Other indications include infantile spasms, Dravet syndrome, recurrent seizures, multiple seizure types, cluster seizures (episodes of increased seizure activity), neurosurgically-induced seizures; see full labeling.

Not an inclusive list of medications and/or official indications. Please see drug monograph at [www.eMPR.com](http://www.eMPR.com) and/or contact company for full drug labeling.
